

Health & Safety Project Manager

Chichester Canal Trading Company operates a very busy multi- faceted tourist business based at the Canal basin in Chichester. We require an experienced H&S professional to undertake a review of our varied operations including trip boats, café and shop activities and our canal and building maintenance operations.

On completion of the initial review we then require the production of a H&S operating manual with recommendations and a timetable for the implementation of any operational changes required to ensure the company operates and complies with current H&S legislation.

Although we are primarily a Volunteer supported business, this project is a temporary paid position but it is possible that a support role for our future ongoing H&S requirements might be agreed.
